SBB Oxygen House - Homepage Automation Test Report

Production assessment - 14 August 2026, 11:05 PM (Sri Lanka time)

Executive summary

Overall result				
ACTION REQUIRED	**130** Tests executed	**113** Passed	**14** Failed	**3** Skipped

One or more automated homepage checks failed. Review the issues below and retest after correction before release approval.

Test information

Website	https://sbb.caliburlabz.com/
Environment	Production
Execution time	14 August 2026, 11:05:21 PM - Asia/Colombo
Browsers represented	chromium, firefox, mobile-chrome, mobile-safari, webkit
Automated duration	1215.0 seconds (sum of test durations)
Evidence	Technical HTML report: playwright-report/index.html; failure artifacts: test-results/artifacts/

Homepage areas tested

Area	Result	Checks
Smoke and availability	**PASSED**	10
Header and navigation	**FAILED**	20
Content sections and scrolling	**PASSED**	10
Buttons and calls to action	**FAILED**	10
Images and image links	**FAILED**	10
Footer	**PASSED**	10
SEO and quality	**FAILED**	20
Products and carousel	**FAILED**	10
Services	**PASSED**	5
Animations	**PASSED**	5

Area	Result	Checks
Accessibility	PASSED	5
Other homepage checks	PASSED	15

Issues and required changes

1. SEO and quality

Failed check: Complete homepage feature coverage › @homepage @quality emits no uncaught page errors and no same-origin failed requests

Observed: expect(received).toEqual(expected) // deep equality

Recommended action: Review the named homepage section, reproduce using the Playwright trace, correct the behavior, and rerun the homepage suite.

2. Images and image links

Failed check: Complete homepage feature coverage › @homepage @images all content images load and have alternative text

Observed: locator.scrollIntoViewIfNeeded: Timeout 5577.55700000003ms exceeded.

Recommended action: Review the named homepage section, reproduce using the Playwright trace, correct the behavior, and rerun the homepage suite.

3. SEO and quality

Failed check: Complete homepage feature coverage › @homepage @quality emits no uncaught page errors and no same-origin failed requests

Observed: expect(received).toEqual(expected) // deep equality

Recommended action: Review the named homepage section, reproduce using the Playwright trace, correct the behavior, and rerun the homepage suite.

4. Products and carousel

Failed check: Complete homepage feature coverage › @homepage @products product pictures open the matching product detail pages

Observed: locator.click: Timeout 10000ms exceeded.

Recommended action: Review the named homepage section, reproduce using the Playwright trace, correct the behavior, and rerun the homepage suite.

5. Header and navigation

Failed check: Complete homepage feature coverage › @homepage @header header contains working logo, contact, cart, and navigation controls

Observed: expect(locator).toHaveAttribute(expected) failed

Recommended action: Review the named homepage section, reproduce using the Playwright trace, correct the behavior, and rerun the homepage suite.

6. Header and navigation

Failed check: Complete homepage feature coverage › @homepage @navigation clicking Shop navigates to the correct page

Observed: expect(locator).toHaveAttribute(expected) failed

Recommended action: Review the named homepage section, reproduce using the Playwright trace, correct the behavior, and rerun the homepage suite.

7. Header and navigation

Failed check: Complete homepage feature coverage › @homepage @mobile mobile navigation opens, exposes links, and closes

Observed: expect(locator).toHaveAttribute(expected) failed

Recommended action: Review the named homepage section, reproduce using the Playwright trace, correct the behavior, and rerun the homepage suite.

8. Buttons and calls to action

Failed check: Complete homepage feature coverage › @homepage @cta hero and section buttons navigate to their correct pages

Observed: locator.scrollIntoViewIfNeeded: Timeout 9979.217999999993ms exceeded.

Recommended action: Review the named homepage section, reproduce using the Playwright trace, correct the behavior, and rerun the homepage suite.

9. Header and navigation

Failed check: Complete homepage feature coverage › @homepage @header header contains working logo, contact, cart, and navigation controls

Observed: expect(locator).toHaveAttribute(expected) failed

Recommended action: Review the named homepage section, reproduce using the Playwright trace, correct the behavior, and rerun the homepage suite.

10. Header and navigation

Failed check: Complete homepage feature coverage › @homepage @navigation clicking Shop navigates to the correct page

Observed: expect(locator).toHaveAttribute(expected) failed

Recommended action: Review the named homepage section, reproduce using the Playwright trace, correct the behavior, and rerun the homepage suite.

11. Header and navigation

Failed check: Complete homepage feature coverage › @homepage @mobile mobile navigation opens, exposes links, and closes

Observed: expect(locator).toHaveAttribute(expected) failed

Recommended action: Review the named homepage section, reproduce using the Playwright trace, correct the behavior, and rerun the homepage suite.

12. Images and image links

Failed check: Complete homepage feature coverage › @homepage @images all content images load and have alternative text

Observed: locator.scrollIntoViewIfNeeded: Timeout 7370.635000000009ms exceeded.

Recommended action: Review the named homepage section, reproduce using the Playwright trace, correct the behavior, and rerun the homepage suite.

13. SEO and quality

Failed check: Complete homepage feature coverage › @homepage @quality emits no uncaught page errors and no same-origin failed requests

Observed: expect(received).toEqual(expected) // deep equality

Recommended action: Review the named homepage section, reproduce using the Playwright trace, correct the behavior, and rerun the homepage suite.

14. Buttons and calls to action

Failed check: Complete homepage feature coverage › @homepage @cta hero and section buttons navigate to their correct pages

Observed: locator.scrollIntoViewIfNeeded: Timeout 9904.56799999997ms exceeded.

Recommended action: Review the named homepage section, reproduce using the Playwright trace, correct the behavior, and rerun the homepage suite.

Interpretation

Passed results are green, failed results are red, and skipped results are orange. PASSED means the stated automated expectation succeeded. FAILED means that specific expectation requires investigation; it does not automatically mean the page was unavailable. In particular, an automated WCAG failure identifies an

assistive-technology markup issue while page availability and ordinary browser operation are reported by separate functional checks. SKIPPED means the check was not run or was not applicable. Automated testing does not replace manual accessibility, usability, content, and stakeholder review.

Detailed test results

#	Test	Browser	Time	Result
1	Home page › loads successfully with meaningful content	chromium	7.8s	PASSED
2	Home page › has no duplicate element IDs	chromium	2.4s	PASSED
3	Complete homepage feature coverage › header contains working logo, contact, cart, and navigation controls	chromium	3.0s	PASSED
4	Complete homepage feature coverage › primary page destinations respond successfully	chromium	5.7s	PASSED
5	Complete homepage feature coverage › clicking Shop navigates to the correct page	chromium	2.9s	PASSED
6	Complete homepage feature coverage › mobile navigation opens, exposes links, and closes	chromium	0.0s	SKIPPED
