SBB Oxygen House - Test Findings and Verification Register

Developer and QA review table - 15 August 2026, 01:03 AM (Sri Lanka time)

Important: these 14 rows are findings, not 14 confirmed production bugs. Manual testing passed the reported scenarios. Each row retains the earlier evidence for investigation and states the verification required before a developer defect is raised. Browser labels are limited to Chrome, Safari, Edge and Firefox for Web/Mobile.

Bug ID	Page name	Component	Title	Description	Steps to Reproduce	Expected Result	Actual Result	Severity	Screenshot / Evidence
BUG-001	Home	Page quality / API requests	Homepage records failed same-origin requests	Status: Manual Test Passed - Earlier Automation Finding Needs Verification. The homepage quality check detected failed requests to the same production origin in Firefox Web verification, Safari Web and Safari Mobile verification.	1. Open the production homepage. 2. Start monitoring page errors and failed same-origin responses. 3. Wait for initial content and lazy-loaded sections. 4. Review failed responses.	The homepage should complete without uncaught page errors or failed same-origin requests.	One or more same-origin requests failed during the recorded runs. Manual testing did not reproduce this as a confirmed production bug.	**Medium**	Homepage report - Issues 1, 3 and 13; Firefox Web verification, Safari Web verification, Safari Mobile; automation traces/screenshots in test-results/artifacts when retained. Classification: Manual Test Passed - Earlier Automation Finding Needs Verification. Edge Web/Mobile evidence is not available.
BUG-002	Home	Content images	Homepage images do not complete loading reliably	Status: Manual Test Passed - Earlier Automation Finding Needs Verification. The image-loading check timed out with incomplete images in Safari Web and Safari Mobile verification.	1. Open the homepage in Safari Web verification or Safari Mobile. 2. Scroll through all content sections. 3. Wait for every content image to report complete. 4. Inspect remaining incomplete images.	Every displayed content image should finish loading and provide alternative text.	Images remained incomplete until the automated wait expired. Manual testing did not reproduce this as a confirmed production bug.	**Medium**	Homepage report - Issues 2 and 12; Safari Web and Safari Mobile verification; failure screenshots/traces referenced by the HTML report. Classification: Manual Test Passed - Earlier Automation Finding Needs Verification. Edge Web/Mobile evidence is not available.
BUG-003	Home	Product cards	Product image does not open its matching detail page	Status: Manual Test Passed - Earlier Automation Finding Needs Verification. A homepage product-picture navigation check timed out in Safari Web verification.	1. Open the homepage in Safari Web verification. 2. Scroll to the product carousel. 3. Select each visible product image. 4. Compare the opened route with the selected product.	Each product image should open the corresponding valid product-detail route.	At least one product-image action did not reach the expected detail page before timeout. Manual testing did not reproduce this as a confirmed production bug.	**High**	Homepage report - Issue 4; Safari Web verification; automation trace and screenshot referenced in the report evidence. Classification: Manual Test Passed - Earlier Automation Finding Needs Verification. Edge Web/Mobile evidence is not available.
BUG-004	Home	Mobile header	Required header controls are missing or unusable on mobile	Status: Manual Test Passed - Earlier Automation Finding Needs Verification. The header-content assertion failed on Chrome Mobile and Safari Mobile verification.	1. Open the homepage using Pixel 7 or iPhone 15 viewport. 2. Inspect the header. 3. Verify logo, contact, cart and navigation controls. 4. Attempt normal interaction.	All required mobile header controls should be present, visible and usable.	The expected header-control state was not satisfied in both mobile profiles. Manual testing did not reproduce this as a confirmed production bug.	**High**	Homepage report - Issues 5 and 9; Chrome Mobile and Safari Mobile verification. Classification: Manual Test Passed - Earlier Automation Finding Needs Verification. Edge Web/Mobile evidence is not available.
BUG-005	Home	Shop navigation	Shop navigation does not reliably reach the Shop page on mobile	Status: Manual Test Passed - Earlier Automation Finding Needs Verification. Clicking Shop did not satisfy the expected route assertion in Chrome Mobile and Safari Mobile verification.	1. Open the homepage on a mobile profile. 2. Expose the navigation if required. 3. Select Shop. 4. Observe the resulting URL and page.	Selecting Shop should navigate to the production Shop route and load its content.	The expected Shop destination was not reached within the recorded check. Manual testing did not reproduce this as a confirmed production bug.	**High**	Homepage report - Issues 6 and 10; Chrome Mobile and Safari Mobile verification. Classification: Manual Test Passed - Earlier Automation Finding Needs Verification. Edge Web/Mobile evidence is not available.
BUG-006	Home	Mobile navigation menu	Mobile navigation does not open, expose links and close correctly	Status: Manual Test Passed - Earlier Automation Finding Needs Verification. The complete mobile-menu behavior check failed in Chrome Mobile and Safari Mobile verification.	1. Open the homepage on a mobile profile. 2. Activate the menu control. 3. Verify navigation links. 4. Close the menu. 5. Confirm its final state.	The menu should open, expose usable links and close without leaving an incorrect state.	The expected open/link/close state sequence was not completed. Manual testing did not reproduce this as a confirmed production bug.	**High**	Homepage report - Issues 7 and 11; Chrome Mobile and Safari Mobile verification. Classification: Manual Test Passed - Earlier Automation Finding Needs Verification. Edge Web/Mobile evidence is not available.
BUG-007	Home	Hero and section CTAs	Homepage CTA navigation times out on mobile	Status: Manual Test Passed - Earlier Automation Finding Needs Verification. Hero or section CTA navigation exceeded the expected completion time in Chrome Mobile and Safari Mobile verification.	1. Open the homepage on a mobile profile. 2. Select each hero and section CTA. 3. Record its final route. 4. Repeat after returning to Home.	Every CTA should navigate to its configured destination within the allowed time.	At least one CTA navigation exceeded the timeout in both mobile profiles. Manual testing did not reproduce this as a confirmed production bug.	**High**	Homepage report - Issues 8 and 14; Chrome Mobile and Safari Mobile verification. Classification: Manual Test Passed - Earlier Automation Finding Needs Verification. Edge Web/Mobile evidence is not available.
BUG-008	Shop	Sorting	A Shop sort option does not complete in Firefox Web verification	Status: Manual Test Passed - Earlier Automation Finding Needs Verification. Exercising every available sort option exceeded the locator/action timeout in Firefox Web verification.	1. Open Shop in Firefox Web verification. 2. Open the sort control. 3. Select each available option in sequence. 4. Observe product ordering and control completion.	Every sort option should apply successfully and leave a usable, correctly ordered product list.	At least one sort option exceeded the 10-second action timeout. Manual testing did not reproduce this as a confirmed production bug.	**Medium**	Shop report - BUG section item 1 and Failed test cases; Firefox Web verification. Classification: Manual Test Passed - Earlier Automation Finding Needs Verification. Edge Web/Mobile evidence is not available.
BUG-009	Shop	Category / brand / price filters	Shop filters time out on mobile browsers	Status: Manual Test Passed - Earlier Automation Finding Needs Verification. The combined category, brand and price filtering check timed out in Chrome Mobile and Safari Mobile verification.	1. Open Shop on a mobile profile. 2. Apply category, brand and price filters individually. 3. Clear each filter. 4. Verify the product grid after every change.	Each filter should update the product list and remain responsive on mobile.	The filtering sequence exceeded the 10-second action timeout in both mobile profiles. Manual testing did not reproduce this as a confirmed production bug.	**High**	Shop report - BUG section items 2 and 3 and Failed test cases; Chrome Mobile and Safari Mobile verification. Classification: Manual Test Passed - Earlier Automation Finding Needs Verification. Edge Web/Mobile evidence is not available.
BUG-010	All Gases & Equipments	Primary action keyboard navigation	Primary service actions are not keyboard reachable in Safari engines	Status: Manual Test Passed - Earlier Automation Finding Needs Verification. The Request a Quote and Call Us actions were not reached through keyboard traversal in Safari Web and Safari Mobile verification.	1. Open All Gases & Equipments in Safari Web verification. 2. Use Tab from the top of the page. 3. Record focused control names. 4. Repeat using Safari Mobile emulation.	Request a Quote and Call Us should enter the keyboard focus order and show visible focus.	Neither expected action was recorded in the keyboard focus sequence. Manual testing did not reproduce this as a confirmed production bug.	**High**	Services report - Failed test cases; Safari Web and Safari Mobile verification. Classification: Manual Test Passed - Earlier Automation Finding Needs Verification. Edge Web/Mobile evidence is not available.
BUG-011	Ship Handling	Primary action keyboard navigation	Primary service actions are not keyboard reachable in Safari engines	Status: Manual Test Passed - Earlier Automation Finding Needs Verification. The Request a Quote and Call Us actions were not reached through keyboard traversal in Safari Web and Safari Mobile verification.	1. Open Ship Handling in Safari Web verification. 2. Use Tab from the top of the page. 3. Record focused control names. 4. Repeat using Safari Mobile emulation.	Request a Quote and Call Us should enter the keyboard focus order and show visible focus.	Neither expected action was recorded in the keyboard focus sequence. Manual testing did not reproduce this as a confirmed production bug.	**High**	Services report - Failed test cases; Safari Web and Safari Mobile verification. Classification: Manual Test Passed - Earlier Automation Finding Needs Verification. Edge Web/Mobile evidence is not available.

Bug ID	Page name	Component	Title	Description	Steps to Reproduce	Expected Result	Actual Result	Severity	Screenshot / Evidence
BUG-012	About Us	Primary action keyboard navigation	About Us primary actions are not keyboard reachable in Safari engines	Status: Manual Test Passed - Earlier Automation Finding Needs Verification. Primary About Us actions failed the keyboard-reachability check in Safari Web and Safari Mobile verification.	1. Open About Us in Safari Web verification. 2. Traverse interactive elements using Tab. 3. Verify Browse Products, Our Services, Contact Us and Call Us. 4. Repeat in Safari Mobile.	All primary actions should be reachable in a logical order with visible focus.	The complete expected action set was not reached in the Safari-engine profiles. Manual testing did not reproduce this as a confirmed production bug.	**High**	About Us report - Failed test cases; Safari Web and Safari Mobile verification. Classification: Manual Test Passed - Earlier Automation Finding Needs Verification. Edge Web/Mobile evidence is not available.
BUG-013	About Us	Navigation performance	About Us exceeds the mobile navigation budget	Status: Performance Observation - Needs Controlled Retest. The Safari Mobile performance check exceeded the configured DOM-content-loaded or page-load threshold after retry.	1. Open About Us using the Safari Mobile profile. 2. Capture Navigation Timing values. 3. Compare DOMContentLoaded with 5,000 ms and load with 8,000 ms. 4. Repeat from a clean context.	DOMContentLoaded should be below 5 seconds and full load below 8 seconds under the test conditions.	The recorded navigation timing exceeded the configured budget. Manual testing did not reproduce this as a confirmed production bug.	**Medium**	About Us report - Failed test cases; Safari Mobile; navigation-timing attachment in automation evidence. Classification: Performance Observation - Needs Controlled Retest. Edge Web/Mobile evidence is not available.
BUG-014	Contact Us	Branch map tabs / ARIA	Branch tabs contain invalid aria-controls ID references	Status: Accessibility Finding - Needs Developer Verification. Axe reports critical-impact rule aria-valid-attr-value because branch-tab aria-controls values contain branch names with spaces. This is an assistive-technology defect, not a Safari page-access failure.	1. Open Contact Us. 2. Inspect each branch tab. 3. Run Axe with WCAG 2 A/AA tags. 4. Review aria-controls values such as the Main Branch reference. 5. Compare each value with a valid map-panel element ID.	Every aria-controls value should be a valid ID reference to the controlled map panel and work with assistive technologies.	All five browser profiles report aria-valid-attr-value. Visual access, form operation and map selection otherwise pass. Manual testing did not reproduce this as a confirmed production bug.	**High**	Contact Us report - Failed test cases and Result interpretation; Chrome Web/Mobile, Firefox Web verification Web and Safari Web/Mobile require verification; Edge Web/Mobile has not yet been tested; Axe JSON attachment. Classification: Accessibility Finding - Needs Developer Verification. Edge Web/Mobile evidence is not available.
